

AUSTRALIA'S MOST COLLECTED WINES 2009

wine-ark
FOR COLLECTORS OF FINE WINE

Established in 1999, Wine Ark is Australia's largest and most recommended wine-storage provider. With well over two million bottles of wine held in their climate-controlled cellars, no one else can offer more experience when it comes to recommending, sourcing and storing collectable wine. In June 2009, a stocktake of every private wine collection in Wine Ark's managed cellars was completed. The objective of the study was to determine which Australian wines, out of the thousands of different labels made in each year, are considered the most cellar-worthy. The labels shown here are Australia's 50 Most Collected Wines for 2009. For a full breakdown of the results, please visit www.wine-ark.com.au.
